The European Left Party - Luke March 2019-12-13

With the stability of the European Union under threat and tensions between the national and supranational increasing, what will happen to the EU party system? For the internationalist European left, European integration and the role of transnational parties represent a central contention and concern. In May 2004, the European radical left, representing parties to the left of social democracy and the Green party family, created the transnational European Left Party (EL), uniting parties like the German Die Linke, Italian Rifondazione Comunista and Greek Syriza. In 2009, the EL fought the European Parliament elections on the basis of a common manifesto, emerging over the last decade as an

apparently stable actor at EU level. As the first detailed study of the EL this book analyses the role of the party in European politics and the politics of the European radical left. What challenges will the EL have to overcome in order for it to become a significant force for the creation of a genuine, democratic European polity? To what degree has the EL enabled an increase in the electoral or policy influence of the radical left in Europe? Written by two of the foremost experts on the European left, this book is essential reading to those interested in how the left has fared in post-crisis Europe.

Rethinking Multilateralism in Foreign Aid - Viktor Jakupec 2020-04-23

This edited book provides a contemporary, critical and thought-provoking analysis of the internal and external threats to Western multilateral development finance in the twenty-first century. It draws on the expertise of scholars with a range of backgrounds providing a critical exploration of the neoliberal multilateral development aid. The contributions focus on how Western institutions have historically dominated development aid, and juxtapose this hegemony with the recent challenges from right-wing populist and the Beijing Consensus ideologies and practices. This book argues that the rise of right-wing populism has brought internal challenges to traditional powers within the multilateral development system. External challenges arise from the influence of China and regional development banks by providing alternatives to established Western dominated aid sources and architecture. From this vantagepoint, *Rethinking Multilateralism in Foreign Aid* puts forward new ideas for addressing the current global social, political and economic challenges concerning multilateral development aid. This book will be of interest to researchers, academics and students in the field of International Development and Global Governance, decision-makers at government level as well as to those working in international aid institutions, regional and bilateral aid agencies, and non-governmental organisations.

Equity in Excellence - Siao See Teng 2018-12-20
This book offers a comprehensive picture of high-performing East Asian education systems, beyond their outstanding achievements in

international assessments, such as PISA and TIMSS. Situating “excellence” within discussions of “equity”, it contextualises the conceptions and pursuits of equity amid the development of education systems, policy and curricula in selected East Asian societies. While parallels could be observed across the systems, including high-stakes assessment culture, increasing credentialism and high investment of family educational resources, there are also divergences in approaches and outcomes relating to equity policies and practices. In light of the challenges presented by low fertility rates, ageing populations, migration, and the economic demands of the 21st century, the book addresses these systems’ attempts to cater to further diversified student populations and maintain equity in excellence. As the international community relentlessly seeks to enhance equity in education, there is much these East Asian education systems can share. This book has appeal internationally to researchers, policymakers, educators, and anyone interested in East Asian education and equity.

Governance and Sustainability - David Crowther
2020-08-19

This book explores the concepts of sustainability and governance in relation to the governance of corporations - hence the ubiquity of the term corporate governance - and other bodies. It examines how these concepts are regularly used by politicians and by the media. The two concepts are however largely treated as being separate and discrete, and given equal coverage. The argument in this book is that the two concepts are inter-related and that good governance is a prerequisite for sustainability. The focus of the book therefore is different from most, as it seeks to integrate these two important issues. The approach used in this book is based on the tradition of the Social Responsibility Research Network - a worldwide body of scholars that, over its 20-year history, has sought to broaden the discourse and to treat all research as inter-related and business-relevant. The book examines diverse aspects of the changes to corporate and institutional behaviour that have recently manifested by focusing on these two aspects of sustainable development. Thus, the authors explore engagement and partnership between organisations, in order to consider the extent to which the focus has changed so much that we need to think about new approaches to our understanding of sustainability and differing effects in practice. The international mix of authors makes this an original contribution, sharing some of the best ideas from around the

world.

Public-Private Partnerships and Responsibility under International Law - Lisa Clarke
2014-03-21

Partnerships between the public and private sectors are an increasingly accepted method to deal with pressing global issues, such as those relating to health. Partnerships, comprised of states and international organizations (public sector) and companies, non-governmental organizations, research institutes and philanthropic foundations (private sector), are forming to respond to pressing global health issues. These partnerships are managing activities that are normally regarded to be within the domain of states and international organizations, such as providing access to preventative and treatment measures for certain diseases, or improving health infrastructure within certain states to better manage the growing risk of disease. In the shadow of the success of these partnerships lies, however, the possibility of something going wrong and it is to this shadow that this book sheds light. This book explores the issue of responsibility under international law in the context of global health public-private partnerships. The legal status of partnerships under international law is explored in order to determine whether or not partnerships have legal personality under international law, resulting in them being subject to rules of responsibility under international law. The possibility of holding partnerships responsible in domestic legal systems and the immunity partnerships have from the jurisdiction of domestic courts in certain states is also considered. The obstacles to holding partnerships themselves responsible leads finally to an investigation into the possibility of holding states and/or international organizations, as partners and/or hosts of partnerships, responsible under international law in relation to the acts of partnerships. This book will be of interest to those researching and working in areas of global governance, especially hybrid public-private bodies; the responsibility under international law of states and international organizations; and also global health. It provides doctrinal clarification and practical guidance in a developing field of international law.

The Post-Socialist Internet - Migle Bareikyte
2022-01-31

How is the Internet produced as an infrastructure in post-socialist Lithuania? Migle Bareikyte contributes to the growing field of STS and media studies with a distinct focus on Eastern Europe. She situates the Internet development in Lithuania's telecom industry with the exploration of its labor practices, geopolitical imaginaries, and critical negotiations from a bottom-up perspective. Bareikyte further explores how fieldwork-based research can foster new theorizations of media infrastructures. Finally, she argues for a situated investigation of new places and actors beyond the United States and Western Europe—such as post-socialist regions—in order to explore the diversity of media infrastructures.

[The Čakavian Dialect of Orbaníci Near Žminj in Istria](#) - Janneke Kalsbeek 1998

Čakavian dialects, the westernmost dialects of the South Slavic language area, have long attracted the attention of investigators, largely owing to the complexity of their prosodic systems. These prosodic systems are interesting not only from a typological point of view, but also contain material of great importance for the study of Slavic historical accentology. The description of a Čakavian dialect in Istria (Croatia) presented in this volume contributes

data for South Slavic historical dialectology, and for historical accentology. The book includes an introduction on Čakavian and other South Slavic dialects, particularly those spoken in Istria, and chapters, based on fieldwork by the author, on the phonology, morphology and some syntactic phenomena of the dialect of Orbaníci. In the chapters on morphology, special attention is paid to accentuation types. The book also contains dialect texts (70 pp.) and a lexicon, in which all attested forms are listed.

Knowledge Management in the Sharing Economy - Elena-Mădălina Vătămănescu
2017-11-14

This volume explores the challenge of engaging knowledge management in a sharing economy. In a hyper-competitive business environment, everything tends to be digital, virtual and highly networked, which raises the issue of how knowledge management can support the decision whether or not to share strategic resources or capabilities. The book answers questions such as: to what extent does the sharing economy preserve or compromise the competitive advantage of organizations? And what are the knowledge-management strategies for competitive, yet cautious sharing dynamics?

Bombardier Abroad - David P. Thomas

2018-10-10T00:00:00Z

In *Bombardier Abroad*, Thomas examines several cases of the Canadian aerospace giant's work in the high-speed rail sector in South Africa, China/Tibet, and Israel/Palestine and argues that these projects are deepening existing social and political tensions. By participating in these infrastructure projects, Thomas argues, Bombardier is both inserting itself into highly contested social and political climates and profiting from actions that further exacerbate existing conditions of dispossession and inequality. Thomas also examines the various ways in which the Canadian state supports the work of Bombardier in these countries. Centred around a theoretical framework that combines concepts of dispossession, political economy and important interventions from the field of settler colonial studies, *Bombardier Abroad* is a critical look at the problematic practices of a Canadian corporation and the ways in which the Canadian state is culpable.

[China's Global Political Economy](#) - Robert Taylor

2018-04-27

Much has been written about China's economy, as well as its business management system. *China's Global Political Economy*, however, is designed to bring together these two perspectives, serving to enhance our understanding of China's growing global role. Examining changes in the management strategies of foreign companies investing in China and Chinese enterprises doing business overseas, this book analyses China's political economy in the context of the Communist Party's changing policies. The introductory section begins by studying the aspects of Chinese economic growth as it impacts on domestic social issues and the projection of Chinese power abroad. Within this overall framework, it then goes on to critically assess the effects of foreign investment, business management strategies, human resource management, corporate social responsibility and the financial services sector. Arguing that the encouragement of consumption is a significant objective of the Chinese leadership, the last section is concerned with the importance of the food industry. This book will be of interest to students and scholars of Chinese business, management and international political economy, as well as policymakers and business practitioners.

Dictionnaire de Marine - Nicolas (rev) Aubin

Oppenheim's International Law: United Nations - Rosalyn Higgins 2018-12-13

The United Nations, whose specialized agencies were the subject of an Appendix to the 1958 edition of Oppenheim's *International Law: Peace*, has expanded beyond all recognition since its founding in 1945. This volume represents a study that is entirely new, but prepared in the way that has become so familiar over succeeding editions of Oppenheim. An authoritative and comprehensive study of the United Nations' legal practice, this volume covers the formal structures of the UN as it has expanded over the years, and all that this complex organization does. All substantive issues are addressed in separate sections, including among others, the responsibilities of the UN, financing, immunities, human rights, preventing armed conflicts and peacekeeping, and judicial matters. In examining the evolving

structures and ever expanding work of the United Nations, this volume follows the long-held tradition of Oppenheim by presenting facts uncoloured by personal opinion, in a succinct text that also offers in the footnotes a wealth of information and ideas to be explored. It is book that, while making all necessary reference to the Charter, the Statute of the International Court of Justice, and other legal instruments, tells of the realities of the legal issues as they arise in the day to day practice of the United Nations. Missions to the UN, Ministries of Foreign Affairs, practitioners of international law, academics, and students will all find this book to be vital in their understanding of the workings of the legal practice of the UN. Research for this publication was made possible by The Balzan Prize, which was awarded to Rosalyn Higgins in 2007 by the International Balzan Foundation.

Enforcing Corporate Social Responsibility Codes - Anna Beckers 2015-10-22

Corporate social responsibility codes are guidelines that companies voluntarily develop and publish with the objective of showing the public their commitment to respect human rights, to improve fundamental workplace standards worldwide and to protect the natural environment. These corporate codes have become a crucial element in the regulatory architecture for globally operating companies. By focusing on the characteristics of the codes, their effects on society and their legal consequences, this book seeks to provide a comprehensive analysis of corporate codes and the law. *Enforcing Corporate Social Responsibility Codes* develops proposals on the relationship between global corporate self-regulation and the national private law systems. It uses methods of comparative law and sociological jurisprudence to argue that national private law can, and in fact should, enforce these codes as genuine legal obligations. The author formulates legal policy recommendations for English and German private law that indicate how the proposed legal enforcement could be realised in practice. The dissertation on which this book is based was awarded the second prize in the humanities category of the Deutscher Studienpreis (German Thesis Award) by the Koerber Foundation in November 2015.

Diplomacy and the Arctic Council - Danita

Catherine Burke 2020-01-16

The Arctic Council, created in 1996, has facilitated over twenty years of successful democracy and regional cooperation between Russia and the seven other Arctic states – the United States, Canada, Norway, Denmark, Iceland, Sweden, and Finland. What has allowed this unity to continue despite political turmoil between these nations? In *Diplomacy and the Arctic Council* Danita Burke argues that the Arctic Council is a club: a group of states that mutually benefit from voluntary collaboration and that use the forum as a vessel to help define and guide the parameters of their cooperation. How the club members identify and address challenges reflects power relations among them, which vary depending on the topic under discussion or debate. Providing insight into the daily practices of the Arctic Council and the relative status of its member states, Burke seeks to understand why major international events, such as the 2014 Russian-Ukrainian conflict over the Crimea region, do not deter the Arctic countries from cooperating. The author posits that the Arctic Council's club structure and its strategy of practising and projecting unity have allowed it to weather the storm of international conflicts involving its core membership. Through interviews with representatives from the Arctic states and Indigenous peoples, *Diplomacy and the Arctic Council* offers a unique look into the diplomatic practices of the council after more than two decades of operation.

Protection of Health and Safety at the Workplace - Kai Liu 2020

This book investigates four core characteristics of occupational health and safety legal systems in order to provide a comparative and critical analysis of the similarities and differences in protecting the health and safety of workers at the workplace. It compares and contrasts five different legal systems, namely those of the EU, the Netherlands, the UK, Sweden and China. Beyond offering an overview of the modes of OHS regulation, instruments and legal enforcement practices, the book helps to answer the question of how to improve working environments in order to protect workers from

all kinds of dangers encountered at the workplace. The intended readership includes researchers with a background in labour law, comparative law, Chinese law and/or European Union law.

Reinventing Legal Education - Alberto Alemanno 2018-05-24

European legal teaching - historically formalistic, doctrinal, hierarchical, and passive - is coming under increasing pressure to reimagine itself as pragmatic, policy-aware, and action-oriented. Out of this context, a bottom-up movement of university law clinics appears to be emerging in Europe. Although intellectually indebted to the US model, the European variant reflects legal education and practice in Europe, specifically the multi-layered and multi-genetic legal landscape resulting from the Europeanization and internationalization of national legal systems, the globalization of European legal markets, and the growing demand for civic engagement in view of increasingly powerful supra-national institutions. Through the prism of clinical legal education, *Reinventing Legal Education* is the first attempt to gather scholarly and systematic reflections on the developments taking place in European legal teaching and practice. This groundbreaking book should be read by anyone interested in how clinical legal education is reinventing legal education in Europe.

Legislative approaches to sustainable agriculture and natural resources governance - Gobena, A. 2020-05-01

This book encompasses a broad range of natural resource sectors, with discrete chapters on water, land, forestry, fisheries, mining, petroleum and agriculture. Given this broad range of areas, the focus of the publication is narrowed to provide an overarching holistic perspective that is supportive of a systems-thinking approach. Recognizing that there are many useful publications elsewhere that detail extensively the specific regulatory elements of sound laws in the respective areas, this book offers the specific prism of highlighting approaches that embrace the pillars of sustainable development, i.e. approaches that recognize and are informed by economic, social and environmental considerations and impacts. Democracy and Executive Power - Susan Rose-Ackerman 2021-10-26

A defense of regulatory agencies' efforts to combine public consultation with bureaucratic expertise to serve the interest of all citizens. The statutory delegation of rule-making authority to the executive has recently become a source of controversy. There are guiding models, but none, Susan Rose-Ackerman claims, is a good fit with the needs of regulating in the public interest. Using a cross-national comparison of public policy-making in the United States, the United Kingdom, France, and Germany, she argues that public participation inside executive rule-making processes is necessary to preserve the legitimacy of regulatory policy-making.

General Reports of the XXth General Congress of the International Academy of Comparative Law - Rapports généraux du XXème Congrès général de l'Académie internationale de droit comparé - Katharina Boele-Woelki 2020-12-17

This book explores convergences of legal doctrine despite jurisdictional, cultural and political barriers, as well as divergences due to such barriers, examining topics that are of vital importance to contemporary legal scholars. Written by leading experts from all continents, its 26 chapters present a comparative analysis of cutting-edge legal issues of the 21st century. While each of the countries covered stands alone as a sovereign state, in a technologically advanced world their disparate systems nonetheless show comparable strategies in dealing with complex legal issues. Several of the chapters show how, in addition to state normative production and state adjudication, a growing panoply of non-state instruments and non-state adjudication are becoming more and more central to the legal field. This book is a key addition to the library of any scholar wanting to keep abreast of the major trends in contemporary law. Representing the current state of law in a vast range of areas, it covers each topic from a comparative perspective. Cet ouvrage, en examinant des sujets d'une

importance vitale pour les juristes contemporains, traite des convergences de la doctrine juridique malgré les barrières juridictionnelles, culturelles et politiques ainsi que des divergences dues à ces barrières. Écrits par d'éminents universitaires de tous les continents, ses 26 chapitres présentent une analyse comparative de sujets juridiques majeurs du 21^e siècle. Dans un monde technologiquement avancé, bien que chaque pays analysé dans cet ouvrage demeure autonome en tant qu'État souverain, l'ensemble des systèmes disparates présente néanmoins des stratégies comparables pour traiter des questions juridiques complexes. En outre, plusieurs chapitres montrent comment, en plus de la production normative et de la résolution des différends étatiques, la panoplie croissante de différents types d'instruments non étatiques et de résolution non étatique des différends devient de plus en plus centrale dans la sphère juridique. Cet ouvrage est un ajout essentiel à la bibliothèque de tout universitaire souhaitant se tenir au courant des principales tendances du droit contemporain. Il couvre un vaste domaine de sujets traités d'un point de vue comparatif et représente l'état actuel du droit dans chaque domaine.

Qatar - Diana Galeeva 2022-05-03

This book explains the parameters of Qatar's political growth by developing an alternative theory of power - 'rented' power. The author

demonstrates how Qatar's emergence as a regional power can be solely explained by its capacity as a gas-rich rentier state. By using Qatar as an empirical case study of the 'rented' power theory, readers will gain insight into Qatar's engagement with non-state actors (political Islam, tribes, media, sports, and others) to wield its power, allowing Qatar to 'rent' the well-established influence of non-state actors due to their transnational nature. The Qatari case demonstrates a state's ability to establish a patron-client relationship with non-state actors, overcoming limitations set by size or military strength to gain international influence. This book is accessible to a wide readership: it will be of interest of scholars, postgraduates, journalists, policy experts, and a general audience whose interests include the politics of the Middle East and the GCC states particularly

Innovation Economics - Robert D. Atkinson 2012-09-04

This important book delivers a critical wake-up call: a fierce global race for innovation advantage is under way, and while other nations are making support for technology and innovation a central tenet of their economic strategies and policies, America lacks a robust innovation policy. What does this portend? Robert Atkinson and Stephen Ezell, widely respected economic thinkers, report on profound new forces that are shaping the global economy—forces that favor nations with innovation-based economies and innovation policies. Unless the United States enacts public policies to reflect this reality, Americans face the relatively lower standards of living associated with a noncompetitive national economy. The authors explore how a weak innovation economy not only contributed to the Great Recession but is delaying America's recovery from it and how innovation in the United States compares with that in other developed and developing nations. Atkinson and Ezell then lay out a detailed, pragmatic road map for America to regain its global innovation advantage by 2020, as well as maximize the global supply of innovation and promote sustainable globalization.
