Daughters of 1968 - Lisa Greenwald
2019-01-01

Daughters of 1968 is the story of French feminism between 1944 and 1981, when feminism played a central political role in the history of France. The key women during this epoch were often leftists committed to a materialist critique of society and were part of a postwar tradition that produced widespread social change, revamping the workplace and laws governing everything from abortion to marriage. The May 1968 events—with their embrace of radical individualism and antiauthoritarianism—triggered a break from the past, and the women's movement split into two strands. One became universalist and intensely activist, the other particularist and less activist, distancing itself from contemporary feminism. This theoretical debate manifested itself in battles between women and organizations on the streets and in the courts. The history of French feminism is the history of women's claims to individualism and citizenship that had been granted their male counterparts, at least in

principle, in 1789. Yet French women have more often donned the mantle of particularism, advancing their contributions as mothers to prove their worth as citizens, than they have thrown it off, claiming absolute equality. The few exceptions, such as Simone de Beauvoir or the 1970s activists, illustrate the diversity and tensions within French feminism, as France moved from a corporatist and tradition-minded country to one marked by individualism and modernity.

Robert Aldrich 1993-09-01

For some, Tahiti, New Caledonia and Wallis and Futuna are idyllic tropical islands with a French flavour, while for others they represent continuing French colonialism, thwarted independence movements and nuclear-testing. This book looks at the realities of the French territories in Oceania, and the former Franco-British condominium of the New Hebrides (now Vanuatu), as well as changing French policy in the region. This study is based on published sources as well as archival material and interviews, and is a sequel to the highly praised *The French Presence in the South Pacific, 1842-1940*.

Less Than a Human - Lavinia Allary

2015-10-21

Migrants in irregular situations are confronted with dangerous circumstances during their journeys toward Western countries and upon their arrival in those countries of destination. While continuously disputed by social and political forces, migrants and their children continue to live an isolated life in our communities, facing discrimination, abuse, and labour exploitation. Courts and tribunals in our societies try to make sense of this human mobility by sorting out basic human rights and economic privileges in a way which is too revolutionary for conservative parties and too slow and unfair for human rights activists. This

book focuses on the issue of human rights protection of migrants in irregular situations. The concept of protection does not refer to a humanitarian definition of aid and intervention on behalf of the victims of migration. Protection here means official recognition by the State and by the law of migrants in irregular situations. It also means recognition of the human rights of migrants, recognition of the migrant as a political actor, and from there, political inclusion and politicization of the migrant. Discussions in international forums are dominated by Westphalian visions of the world, and no change can be envisioned in the near future with this kind of discourse. In a highly individualized and fragmented world, an undocumented migrants' destiny is instead decided on a case-by-case basis in our national courts, and today the most effort is put into advocacy and legal representation. How successful the rights claims are today, what the political context of their development is, and how social and political

actors position themselves in regards to irregular migration are points discussed in this book. Foreword Prof. François Crépeau, McGill University, Canada

Supplemental Nutrition Assistance Program

- National Research Council 2013-05-23

For many Americans who live at or below the poverty threshold, access to healthy foods at a reasonable price is a challenge that often places a strain on already limited resources and may compel them to make food choices that are contrary to current nutritional guidance. To help alleviate this problem, the U.S. Department of Agriculture (USDA) administers a number of nutrition assistance programs designed to improve access to healthy foods for low-income individuals and households. The largest of these programs is the Supplemental Nutrition Assistance Program (SNAP), formerly called the Food Stamp Program, which today serves more

than 46 million Americans with a program cost in excess of \$75 billion annually. The goals of SNAP include raising the level of nutrition among low-income households and maintaining adequate levels of nutrition by increasing the food purchasing power of low-income families. In response to questions about whether there are different ways to define the adequacy of SNAP allotments consistent with the program goals of improving food security and access to a healthy diet, USDA's Food and Nutrition Service (FNS) asked the Institute of Medicine (IOM) to conduct a study to examine the feasibility of defining the adequacy of SNAP allotments, specifically: the feasibility of establishing an objective, evidence-based, science-driven definition of the adequacy of SNAP allotments consistent with the program goals of improving food security and access to a healthy diet, as well as other relevant dimensions of adequacy; and data and analyses needed to support an evidence-based assessment of the adequacy of SNAP allotments.

Supplemental Nutrition Assistance Program: Examining the Evidence to Define Benefit Adequacy reviews the current evidence, including the peer-reviewed published literature and peer-reviewed government reports. Although not given equal weight with peer-reviewed publications, some non-peer-reviewed publications from nongovernmental organizations and stakeholder groups also were considered because they provided additional insight into the behavioral aspects of participation in nutrition assistance programs. In addition to its evidence review, the committee held a data gathering workshop that tapped a range of expertise relevant to its task.
